Mechanical Engineering Student | Seguin, TX | (512) 903-7136 | danieljehperez@gmail.com

SUMMARY

Mechanical Engineering student at Texas State University graduating May 2027 with hands-on experience in mechanical systems, CAD design, fabrication, manufacturing, FEA, and failure analysis.

EDUCATION

Bachelor of Science in Mechanical Engineering
Texas State University — Expected May 2027

CERTIFICATIONS

Certified SOLIDWORKS Professional (CSWP) | Six Sigma Green Belt

SKILLS

CAD & Analysis: SolidWorks, FEA, Blender 3D, Technical Drawings

Fabrication: Welding, Metal Fabrication, Prototyping, 3D Printing

Mechanical Systems: Diagnostics, Drivetrain, Hydraulics, Failure Analysis, Process Improvement

EXPERIENCE

Josias Auto Service LLC — Engineering Technician / Mechanical Systems Lead

Jan 2023 – Present

- Designed and fabricated custom components to resolve real-world equipment and system failures
- Diagnosed mechanical and thermal failures using system data and operating conditions
- Developed SolidWorks parts, layouts, and fabrication plans for custom repair and equipment solutions

Alamo Group TX — Mechanical Engineering Design Intern

Jul 2024 – Aug 2024

- Designed a heavy-duty manufacturing fixture in SolidWorks and used FEA to evaluate structural performance before fabrication
- Worked directly with fabricators to refine the fixture for manufacturability and design requirements
- Supported a Kaizen investigation that traced robotic-welding variation upstream to brake-press process inconsistencies and helped identify corrective improvements

Port Enterprises LTD — Fleet Maintenance Technician

Jun 2017 – Aug 2023

- Maintained and repaired fleet vehicles to support daily operations
- Diagnosed engine, brake, suspension, and drivetrain issues under real-world conditions

LEADERSHIP AND INVOLVEMENT

Design & Fabrication Club (DFC) - Director of Operations (Project Lead)

2026 – Present

- Expanding club work into hands-on design, prototyping, and fabrication projects
- Coordinating with ASME, Robotics Club, and other student organizations to support project completion
- Defining project workflow and direction to improve team execution and practical engineering experience

PROJECTS

Senior Design - Pneumatic Launch System | In Progress

- Developing a compressed-air launch system focused on pressure control, safety, trajectory, and repeatability

Two-Story Office Expansion | In Progress

- Building a fabrication space for 3D printing, laser cutting, vinyl, and prototyping

40 × 60 Steel Shop Build - Designed and built a 40 ft × 60 ft × 18 ft steel shop using SolidWorks, FEA, structural fabrication, welding, and construction coordination
