

JEHOSAF PEREZ

Mechanical Engineering Student | Seguin, TX | (512) 903-7136 | danieljehperez@gmail.com

SUMMARY

Mechanical Engineering student at Texas State University, graduating May 2027, with hands-on experience in mechanical systems, fabrication, CAD design, failure analysis, and practical problem solving

EDUCATION

Bachelor of Science in Mechanical Engineering
Texas State University — Expected May 2027

CERTIFICATIONS

Certified SOLIDWORKS Professional (CSWP) | Six Sigma Green Belt

SKILLS

CAD & Design: SolidWorks, Blender 3D, 2D/3D Modeling, Technical Drawings

Fabrication: Welding, Metal Fabrication, Prototyping, 3D Printing

Mechanical Systems & Analysis: Diagnostics, Drivetrain, Hydraulics, Failure Analysis, Process Improvement

EXPERIENCE

Josias Auto Service LLC – Engineering Technician / Mechanical Systems Lead

Jan 2023 – Present

- Designed and fabricated custom components to resolve real-world equipment and system failures
- Diagnosed mechanical and thermal failures using system data, pressure, temperature, and operating behavior
- Used SolidWorks for part design, layout, and fabrication planning

Alamo Group TX – Mechanical Engineering Intern

Jul 2024 – Aug 2024

- Created and modified SolidWorks CAD models and engineering drawings for production
- Worked with engineers to improve component design and manufacturability

Port Enterprises LTD – Fleet Maintenance Technician

Jun 2017 – Aug 2023

- Maintained and repaired fleet vehicles to support daily operations
- Diagnosed engine, brake, suspension, and drivetrain issues under real-world conditions

LEADERSHIP AND INVOLVEMENT

Design & Fabrication Club (DFC) - Director of Operations (Project Lead)

2026 – Present

- Expanding club work into hands-on design, prototyping, and fabrication projects
- Coordinating with ASME, Robotics Club, and other student organizations to support project completion
- Defining project workflow and direction to improve team execution and practical engineering experience

PROJECTS

Senior Design - Pneumatic Launch System | In Progress

- Developing a compressed-air launch system focused on pressure control, safety, trajectory, and repeatability

Two-Story Office Expansion | In Progress

- Building a fabrication space for 3D printing, laser cutting, vinyl, and prototyping

Steel Structure Builds

- Designed and built steel structures up to **60 ft × 40 ft × 18 ft**, including fit-up, alignment, welding, and field adjustments
